Technical Blogging
Computer Gaming

EXPERIENCE

HMX MEDIA | SDE (FRONT-END)
Aug 2023 - Present | Pune, In

- **Developed**, **Maintained**, and **Optimized** Real-time Web and Mobile Experiences for 3D Products for global Clients (**Dell, Lenovo, Royal Enfield, Sharp, McLaren**), etc.
- Collaborated with the product team, Back-end team, and Design team to **design, build, test**, and **improve** the product using agile methodologies and tools such as **Jira**, **Ftrack**, etc.
- Involved in day-to-day tasks of gathering requirements, **feature releases, bug fixes**, and **building new flows/features.**
- Ensured high-quality **production-ready** code by **reviewing code** from other developers and **suggesting** improvements too.
- Utilized: ReactJs, TypeScript, WebGL, WebXR, WebAPI, GIT.

CHAT 360 | REACT JS DEVELOPER
jan 2023 – july 2023 | Pune, In

- Developed a drag-and-drop system to build fully **customizable bots.** The bot deploys on Websites, **WhatsApp, Facebook Messenger** , and other technologies and the admin can interact and do **real-time** chatting with users using any of your bots anytime.
- Gained experience in writing production-level code on technologies like React, Tailwind CSS, Redux Toolkit, Typescript, and React Query.
- Developed various customized, reusable, and responsive components that can be used over the applications.
- Utilized: React, Typescript, Socket.io, React Query, React Formik, Redux Toolkit, and Tailwind CSS.

PROJECTS

TOLLTRACKER | GITHUB
• Built the entire platform from scratch using ReactJs, TypeScript, Tailwind CSS, Redux Toolkit Frameworks
• This project involved the development and integration of key features such as **real-time monitoring, secure transaction records.**

YOUTUBE KIDS CLONE | DEPLOYED LINK | GITHUB
• Built the entire platform from scratch using ReactJs, TypeScript, Tailwind CSS, Redux Toolkit Frameworks
• YouTube Clone with the features like **video Streaming, Authentication(SignIn/SignUp), Wathing History, Searhing Videos.**

SNAKE GAME | DEPLOYED LINK | GITHUB
• Built the entire platform from scratch using JavaScript, Tailwind CSS and Canvas
• This Project is Platform Independent play it on any device.
